

world premiere

# Design and benefits in perfect harmony

**Setting new standards in ergonomics and performance – This was the aim of the new development of L.ADU pneumatic 150.** The new pneumatic drilling machine from LÜBBERING stands in a top-class of design and ergonomics. Together with industrial designer Stefan Eckstein, design and benefit were brought into perfect harmony with a strongly optimised handle shape, lower weight and an improved arrangement of the relevant machine elements. The result is unique in the world: anyone who picks up the L.ADU pneumatic 150 will never want to let it go.

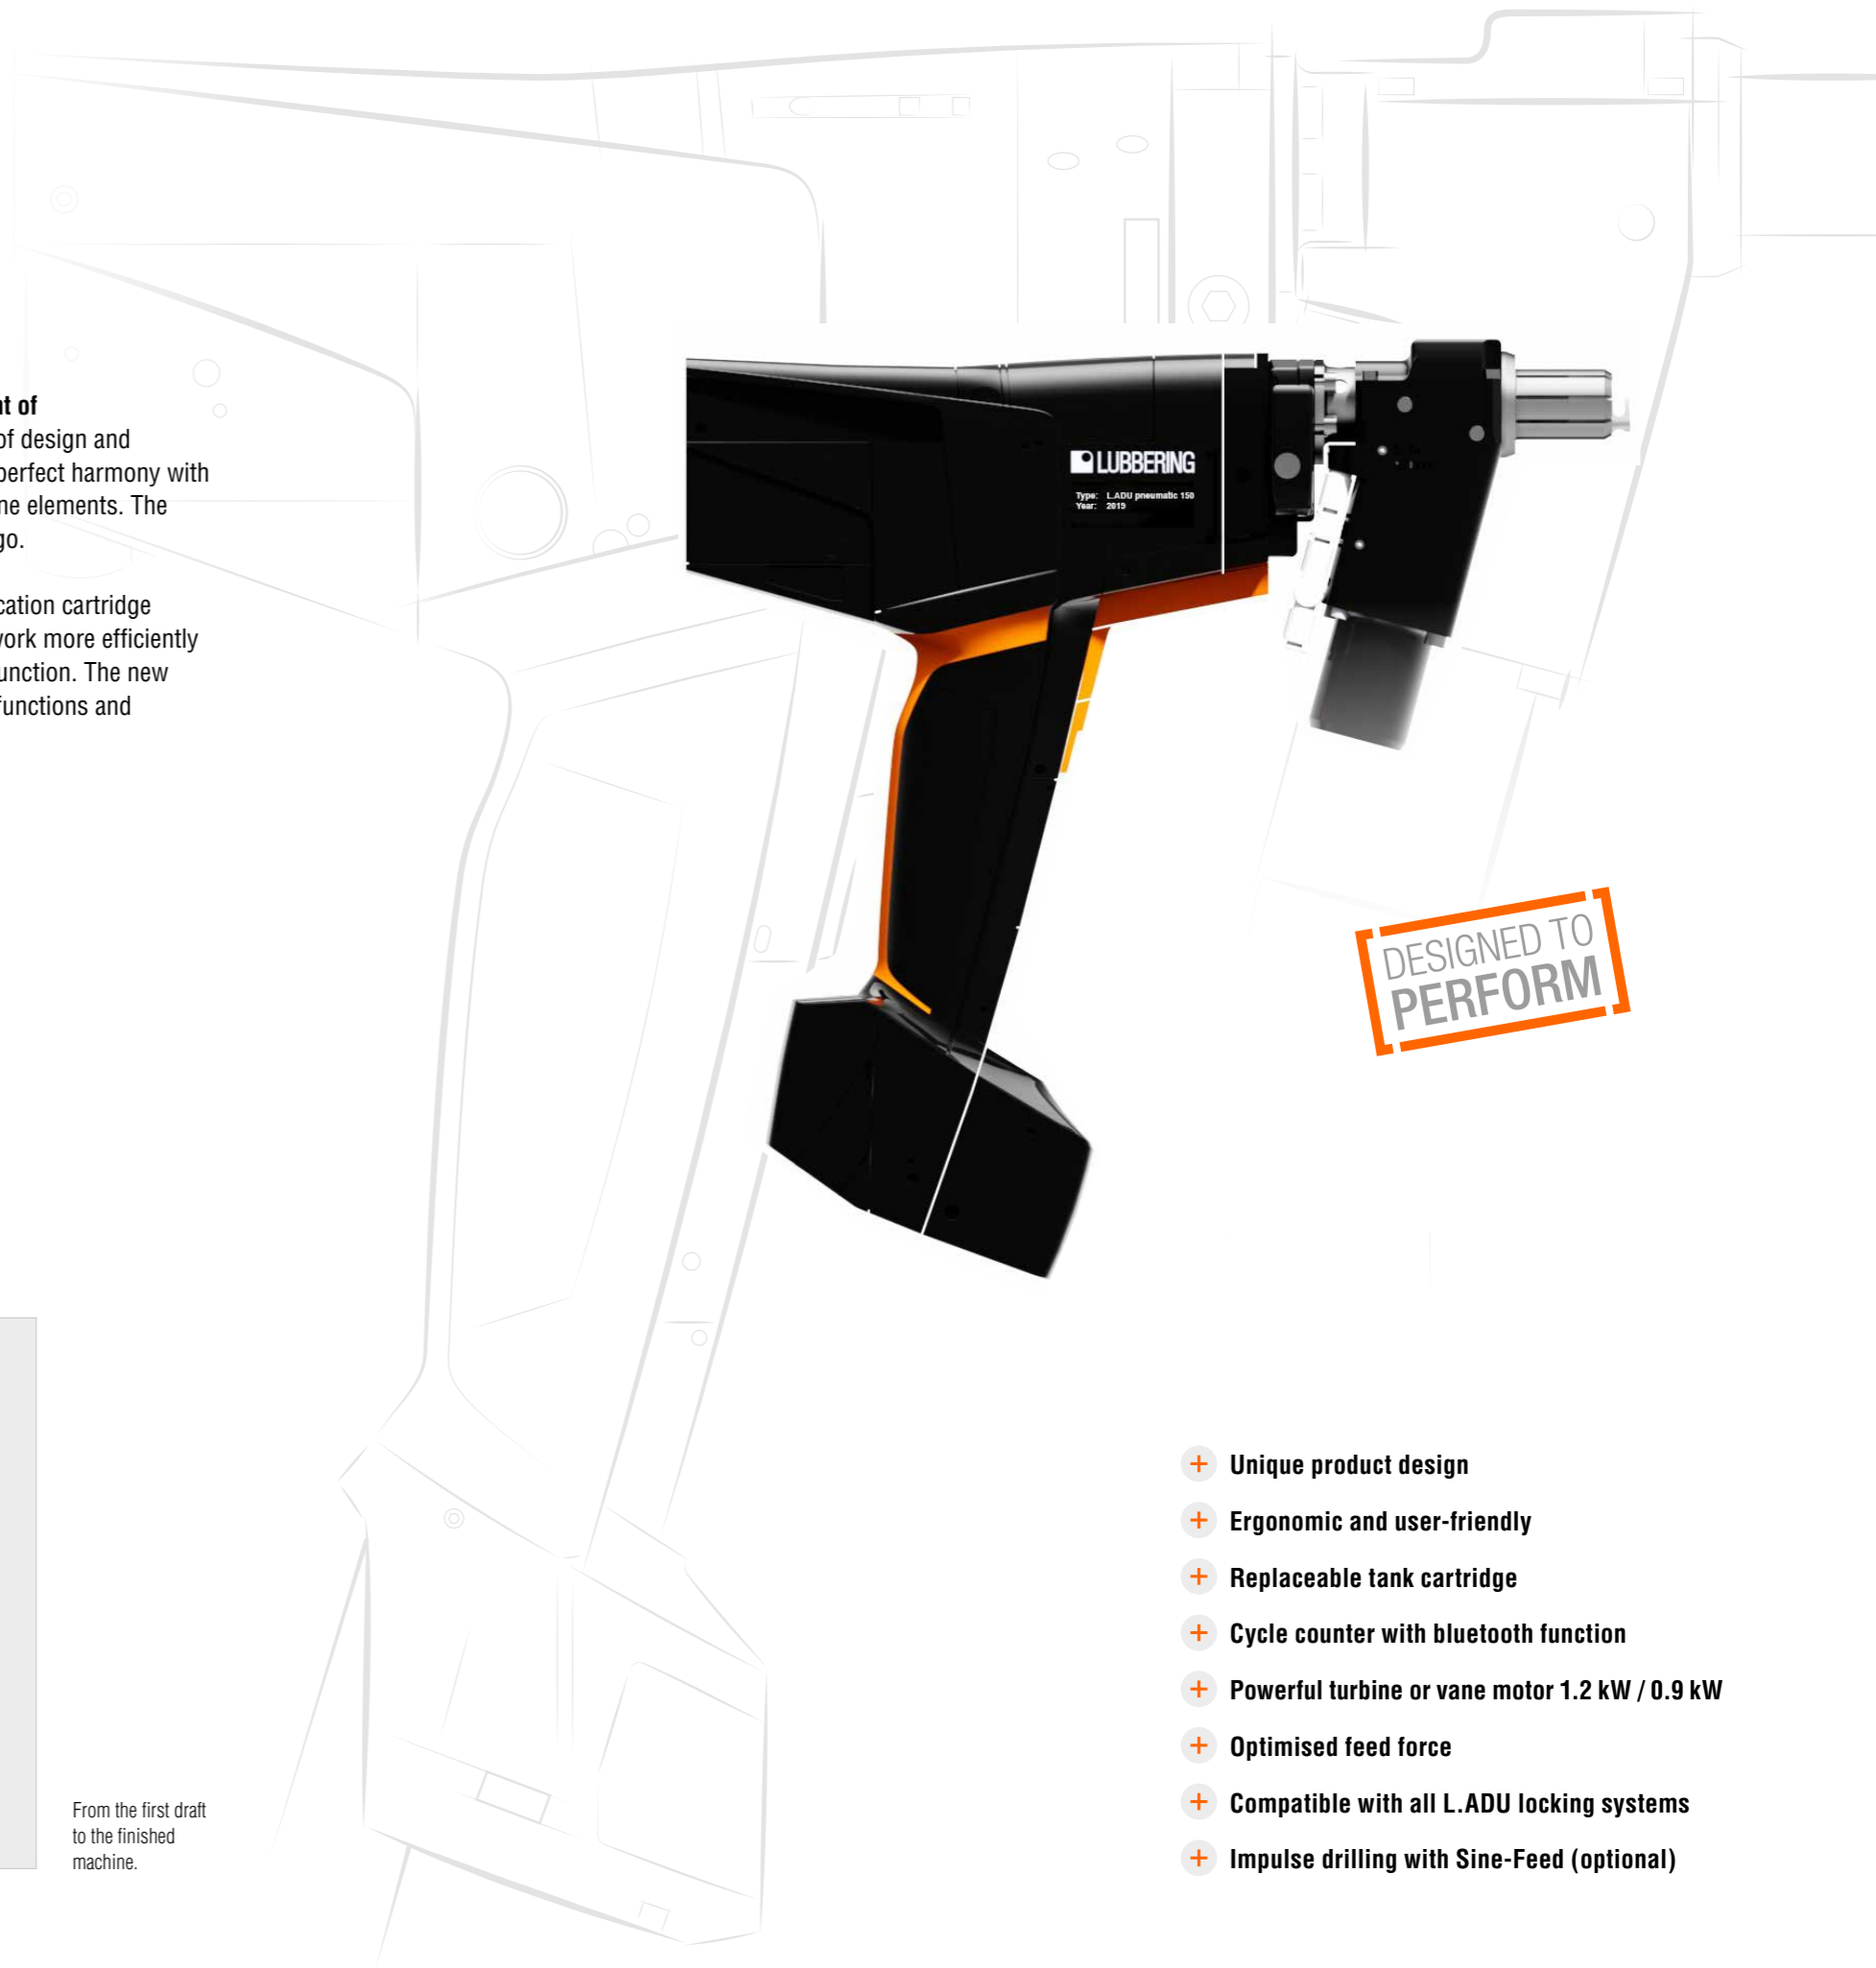

And L.ADU pneumatic 150 also has a lot to offer from a technical point of view: The replaceable lubrication cartridge and the multifunctional cycle counter are innovations with high added value for the user. Save time, work more efficiently and have direct access to important, relevant data – conveniently via the newly integrated Bluetooth function. The new L.ADU pneumatic 150 high-performance drilling machine impresses not only with its new additional functions and ergonomic design, but also with the highest drilling quality and optimised feed forces.

From the first draft  
to the finished  
machine.

- + Unique product design
- + Ergonomic and user-friendly
- + Replaceable tank cartridge
- + Cycle counter with bluetooth function
- + Powerful turbine or vane motor 1.2 kW / 0.9 kW
- + Optimised feed force
- + Compatible with all L.ADU locking systems
- + Impulse drilling with Sine-Feed (optional)
